of the tank terminal projects under expansion are located in the Asian region.

45%

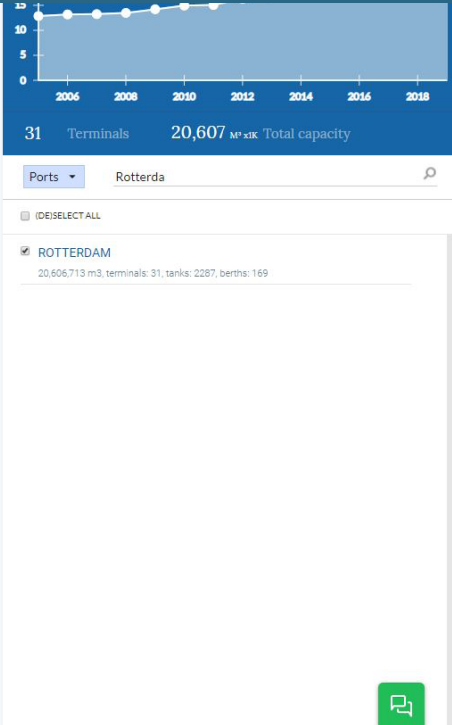

of the tank terminal projects which have a planned expansion are located in the Middle East.

Total tank storage capacity from every region

New add-ons

Infrastructural Competitive Benchmarking

The benchmarking tool allows you to compare multiple terminals with each other from a selected search result. This comparison is possible on tank capacity, number of tanks, tank size, type of products, number of berths, drafts, etc.

Tank Capacity Evolution and Projection

The feature shows data both on the historic evolution and future capacity of a tank terminal. The tool indicates if a terminal is healthy financially, thus signalling its business continuity.
